## Volley Quickguide

1. Without saying it outloud, each player will choose **1 stat** to volley against the other and **roll their 2d6, adding or subtracting their modifier.**
2. Once both of the players have rolled, the Narrator should call on them both to call out their stat, briefly describing what they want to do.
3. If one player has Advantage over another player's stat, they should roll twice and take the higher amount.
  - a) If players choose the same stat, advantage is not accounted for.
4. The player with the higher value wins the volley and the player who wins 2 volleys first, wins the scene!
